Our New Hung Tak factory was built in 1996, starts from household hardware, and later develop the glass fittings hardware. Our total area is 25,000m<sup>2</sup>, construction area 20,000m<sup>2</sup>. Factory has modern plant and advanced facilities, such as milling, CNC, punching, cutting, welding, polishing and bending machines etc.

S.U.P listens to your sound carefully, pays attention to each detail, provides a higher quality service all the time for you.

Welcome all OEM orders from domestic and overseas !

S.U.P strictly select raw materials, the following materials are mainly used according to the appearance and function. The embryos are processed with most advanced surface treatment technology.

1. Stainless steel--Mainly AISI 304 class stainless steel, the surface can be polished into mirror, TIN or PVD or other vacuum films can be coated on the mirror surface, or make stainless steel into satin, and the surface can be coated with paint into different colors.
2. Copper--Directly for polishing, the product itself features the functions of sterilizing and restraining bacteria, the surface can be protected with transparent coating for preventing oxidation. Additionally, the surface of copper is also electroplated with different materials, including polished chrome, satin chrome, satin nickel, titanium and zirconium etc.
3. Aluminum--We apply pure aluminum, the surface is treated with anode oxidation technology, or the surface can be treated into frosted effect in silver or golden, the surface is wearable resistant and anti-corrosion.
4. Zinc Alloy--We apply the best zinc ally, the surface is treated by diversified electroplating technology or coated.
5. Diversified Non Metals--Non metals are widely used, including high grade wood, organic glass and stone etc.

With fine grinding, the surface is also used with latest surface anti-bacteria materials.
